

AI JOB MARKET ANALYSIS PROJECT

Business Requirements Document (BRD)

1. Project Overview

A professional analytics agency (Once Analytics) wants to build an interactive AI Job Market Analytics Dashboard in Power BI to monitor and analyze overall job posting trends, salary distributions, application volumes, competition ratios, and skill demands across different regions and business sectors.

The management team and stakeholders face challenges in tracking:

- Overall job market growth and employment dynamics.
- Monthly trends in job openings and recruitment spikes.
- Salary variations across different experience levels.
- Work model distributions (Remote, Hybrid, On-Site).
- Top competitive roles and high-demand technical skills.

The objective of this dashboard is to provide a centralized analytical solution that helps stakeholders:

- Monitor primary workforce KPIs in real time.
- Identify high-paying roles and lucrative experience tiers.
- Analyze recruitment patterns and skill requirements.
- Improve career and hiring decision-making strategies.

The dashboard allows users to dynamically filter data by:

- Year
- Month
- Employment Type
- Experience Level

2. KPI Requirements (Dashboard 1 – Executive Summary)

Main KPIs

1. **Total Jobs**
 - Displays the total number of job openings tracked within the period.
2. **Average Salary (USD)**
 - Calculates the average compensation across filtered job postings.
3. **Total Applicants**
 - Shows the aggregate volume of job applicants in the market.
4. **Competition Ratio**
 - Tracks market competitiveness based on applicant-to-job metrics.

3. Chart Requirements (Dashboard 1)

1. Total Job by Month

- **Chart Type:** Area / Line Chart
- **Objective:** Analyze monthly job posting trends throughout the year to identify seasonal spikes or drops.

2. AVG Salary by Experience Level

- **Chart Type:** Vertical Bar Chart
- **Objective:** Compare average salaries across Executive, Lead, Senior, Mid, and Entry tiers.

3. Total Jobs by Work Model

- **Chart Type:** Donut / Pie Chart
- **Objective:** Analyze the distribution of remote, hybrid, and on-site job opportunities.

4. Top 10 Competitive Roles

- **Chart Type:** Horizontal Bar Chart
- **Objective:** Identify roles with the highest competition ratios in the market.

5. Top 10 Most In-Demand Skills

- **Chart Type:** Horizontal Bar Chart
- **Objective:** Highlight key programming languages and technical tools required by employers.

4. Dashboard 2 – Detailed Records

- Create a detailed grid view and drill down for underlying records as well.
- Includes granular data columns: *Job Id, Job Title, Location, Industry, Level, Type, Salary (USD), Local Currency, Applicants, and Deadline.*
